Recent computer science graduate with a passion for all things tech. From computer hardware, to software and web-based applications I have spent the last 4+ years gaining experience with web technologies like HTML, CSS, JavaScript, RESTful API's, and OOP languages like Java. An overall versatile performer who thrives in both small or large teams and slow or fast pace environments.

Skills

Languages & Technologies

- JavaScript, CSS, HTML, Bootstrap, Bulma, Java, OCaml, Node.js, React.js, SQL, JQuery, MongoDB, Git, GitHub, Bitbucket, Express.js, Postman, Java Swing.

Experience

Junior Software Developer

MPower Trading Systems, LLC Haverford, PA / June 2021 - Present

- Performed morning health checks of production environments, servers, microservices, and client app.
- Added and removed servers and services from our health check as needed.
- Experienced real world software development lifestyle practices using platforms like JIRA.
- Implemented UI design changes in both the login screen and main panels.
- Created documentation for myself and future developers to refer to in Confluence
- Attended and provided input during standups, code reviews, and client meetings.
- Assisted dev team in a large-scale brokerage integration.

Beverage Sales Associate

Joe Burn's Beverages, Downingtown, PA / July 2020 – May 2021

- Checked out customer's orders by scanning items or typing codes of beverage products.
- Stocked walk-in cooler, shelves, and fridges as products were sold.
- Refilled, maintained, and served take-out drinks.

Projects

Pokédex Web App

- Responsive PWA application that allows users to search any Pokémon of their choice and displays an image and stats via the PokeAPI. See LIVE: Pokédex-App
-

Covid-19 Tracker

- React app that pulls data from a covid API and displays infected, recovered, and death stats for a specific country. See LIVE: Covid-19 Tracker
